# System Backup

The system backup function allows you to backup and restore the settings and configuration of your network drive.

Field	Description
Backup	Click **Backup** to save your current settings in a ZIP file that you can store on your computer.
Upload	Click **Upload** and select a previous backup file (ZIP file) in order to restore the settings to the previous state.
Restart	Click **Restart** to reboot the system

You must reboot the system after uploading an old backup (ZIP file) in order to completely restore the settings.
